 **20MM THICKNESS**

BEAUTY WITH BALANCE, ELEGANCE WITH SAFETY

One of the most important aspects of our R11 collection is its **20mm** thickness, which is specifically designed to meet the demands of outdoor spaces. Outdoor flooring is often exposed to constant pressure, heavy loads, and changing weather conditions, which can quickly damage ordinary tiles. With a 20mm thickness, our tiles are built to handle these challenges with ease. The additional thickness gives the tiles extra strength, allowing them to withstand not only regular foot traffic but also the weight of outdoor furniture, vehicles in certain areas, and continuous environmental stress. This structure also reduces the risk of cracks or breakage, ensuring stability and reliability over time.

AVAILABLE SIZE

SHAPING SPACES WITH ELEGANCE AND ENDURANCE.

Our collection is available in three versatile sizes. These options give flexibility in design and installation, whether you are working on a large terrace, a compact balcony, or a medium-sized patio. By offering multiple sizes, our collection allows architects, designers, and homeowners to create layouts that suit their unique space requirements.

BLENDING SAFETY, DURABILITY, AND EVERLASTING ELEGANCE

The finishing of our R10 and R11 surface is what makes them stand out. The R10 matt finish offers a subtle, natural look with excellent underfoot comfort, while the R11 surface finish provides enhanced grip, reducing the risk of slipping even when the surface is wet or exposed to moisture. This makes them ideal for areas where safety cannot be compromised. At the same time, both finishes are designed to be easy to clean, combining safety, style, and convenience for outdoor living.

LUXURY TILES BUILT WITH
STRENGTH, STYLE, AND AFFORDABILITY

APPLICATION AREAS

Our collection is specially designed for outdoor applications where safety and durability matter the most. These tiles are a perfect fit for swimming pool decks, patios, balconies, terraces, garden walkways, and other open areas. Their anti-slip surface ensures a secure grip even in wet zones, while their durability allows them to handle constant outdoor use. With these qualities, the collection brings peace of mind along with functionality, making outdoor spaces safer and more dependable.
